## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kosmala (6,007,359) in view of Hayashi et al. (6,139,360).
2. See paragraph 1 of the previous office action of 7/26/05.
3. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 6 above, and further in view of Kendall et al. (4,736,275).
4. See paragraph 3 of the previous office action.
5. Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 1 above, and further in view of Ammon et al. (4,572,604).
6. See paragraph 4 of the previous office action.

### ***Response to Arguments***

7. Applicant's arguments filed 12/22/05 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the teaching and motivation for connecting the cable assembly of Kosmala to multiple circuit boards

Art Unit: 2839

simultaneously by providing it with a connector at each side of the cable assembly, can be found in the teachings of Hayashi which teaches that it is old and well known to provide cable connectors at either ends of his various cable assemblies. The motivation to combine is inherent since Kosmala and Hayashi are both directed to the analogous art of connectors for connecting to circuit boards.
